Career Objective

Fresher in AI and Machine Learning seeking an entry-level role or internship. Interested in applying skills to real-world projects and improving through hands-on experience.

Education

B.E. in Artificial Intelligence & Data Science

2025 – Present

Dr. D. Y. Patil Institute of Technology, Pune

Diploma in Artificial Intelligence & Machine Learning

2022 – 2025

K. K. Wagh Polytechnic, Nashik

Technical Skills

- **Programming:** Python, Core Java (OOP)
- **AI/ML:** Machine Learning, Deep Learning (CNN), Basic NLP
- **Data Analysis:** Pandas, Data Cleaning, Data Visualization
- **Web:** HTML, CSS, JavaScript
- **Tools:** Streamlit, GitHub, Jupyter Notebook, Power BI, MySQL

Projects

Employee Salary Prediction System

- Built a model using dataset of **1000+ records** to predict employee salaries
- Cleaned and processed data to improve prediction accuracy
- Identified salary trends to support better decision-making

Tomato Leaf Disease Detection (CNN)

- Developed a CNN model to detect diseases from leaf images
- Classified **multiple disease types** with good accuracy
- Improved performance through training and testing

Internship Experience

Machine Learning Intern – V Analytics Pvt. Ltd.

Jun 2024 – Aug 2024

- Built ML models on marketing datasets
- Processed and evaluated customer feedback using NLP
- Worked on real datasets to understand ML workflows

Artificial Intelligence Intern – Codec Technologies Pvt. Ltd.

Oct 2025 – Jan 2026

- Built AI models using Python
- Created dashboards and performed data analysis
- Gained practical experience in real-world AI projects

Research & Trainings

DeepAgroNet: CNN-Based Tomato Disease Detection

IEEE ESCI Conference, March 2026

- Built CNN model for disease detection from leaf images
- Classified diseases with good accuracy
- Used image processing for automated detection

Certifications

- AWS Academy Cloud Foundations — June 2024
- Machine Learning Using Python — January 2026
